

CPC Pipe Cable Cover Kit Installation Instructions

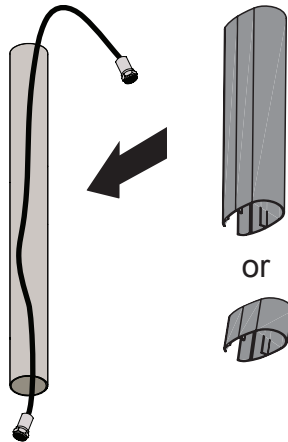

The CPC Pipe Cable Covers fit over pipes and tubing. Conceal cables and electrical conduits by running them alongside the pipe or tubing. The CPCs fit 1½" pipes, 2" pipes, 2" tubing, 1"x1" square tubing, and Premier Mounts' elliptical tubing.

Step 1

After you have completed installing the A/V components, choose the appropriate CPC length for the pipe or tubing.

 You may use multiple CPCs together to conceal all cable and electrical wiring.

Step 2

Clasp the CPC over the cabling or wiring, and pipe or tubing (Figure 1).

 Make sure the pipe or tubing is outside the inner ribs of the CPC (Figure 2).

 Clasp the CPC over the wide side of the elliptical tubing (Figure 2).
